Mr. Thomas Kalitowski
Executive Director
Minnesota Pollution Control Agency
1935 W. County Road B2
Roseville, MN 55113

Dear Mr. Kalitowski:

In accordance with the commitment made to you by letter by J. W. Haun, Vice President, Engineering Policy, General Mills, Inc. in his letter dated July 19, 1984, enclosed is a copy of the engineering report by Barr Engineering Company entitled, Feasibility of Treating Groundwater Removed by Pumpout Wells, General Mills East Hennepin Avenue Site.

I have also arranged for a meeting with Mr. Bruce Davis, Project Leader, MPCA, on Friday, August 17, 1984, at 1:30pm to discuss the technical features of this report as they might apply to the Remedial Action Plan (RAP) for this site.

I am also enclosing herewith a copy of a proposed Administrative Order and Response Order by Consent (CO) and also a revised RAP which reflect the conclusions and recommendations in the above engineering study. We will also be glad to arrange a meeting with appropriate MPCA staff to discuss the revisions, if any, to the proposed CO and RAP.

Copies of the engineering report and proposed CO and RAP are also included herewith for MPCA staff as listed below.

Sincerely yours,

Donald J. Thimsen, P.E.
Manager, Environmental Engineering
Project Leader
